Development: Java, Python, HTML, CSS, JavaScript, Servlets/JSP, AWT, FastAPI

Testing & delivery: Git, GitHub, GitHub Actions, Jenkins, Maven, JUnit, Docker

Data & computer vision: pandas, scikit-learn, OpenCV

SELECTED ACADEMIC & PORTFOLIO PROJECTS

Student Grade Calculator

CI Engineer and Git Lead | Team assessment

Java Servlet/JSP application for weighted marks and grades. The project includes Maven/JUnit testing, GitHub Actions and Jenkins build workflows, and Docker packaging for Tomcat deployment. [Source code](#)

IdentityGuard

Python API and Java integration | Prototype

FastAPI interface for document text extraction, face comparison and liveness checks, with a Java client demonstrating API integration. Uses Python and OpenCV. [Source code](#)

Credit Card Fraud Detection

Team lead | VUT Business Analysis project

Team proof of concept using Python, pandas, scikit-learn and SMOTE to prepare imbalanced transaction data and compare classification models for fraud detection. [Source code](#)

Student Records Management

Java desktop application

AWT interface with ArrayList-based record handling, student search, highest-mark display and record counts.

SELECTED CREDENTIALS

Java Programming Fundamentals Specialization - IBM / Coursera, Dec 2025

Git and GitHub Essentials - Coursera, Nov 2025

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate - Jul 2025 (expires Jul 2027)

Oracle Data Platform 2025 Certified Foundations Associate - Nov 2025 (expires Nov 2027)
